

CASE STUDY

FOUNTAIN STUDIOS UNDER WAY!

Air Options have been recently appointed as principle contractor at Fountain Studios, Wembley, London. We are absolutely delighted to get this project under way and has taken many months of planning in getting the approvals in place from Brent Council for the HVAC works.

Fountain studios host many TV shows such as the X Factor, Britains Got Talent, The Last Leg and much much more. It's a wonderful facility that will be made even better as a consequence of adding air conditioning to Studio A. In addition to this we will be adding an extremely energy efficient Building Energy management System (BEMS) allowing us and the client to control their system remotely and run it at optimum efficiency. The scope of works extend to the following;

- Planning liaison and application with local authority
- Acoustic and structural approvals
- Project and site management
- Installation of a 4 stage DX cooling system
- Design and installation of a BEMS system to suit the specific needs of the client
- Health & Safety, site enabling and all builders works

All works were completed early 2016, take a look at some of the wonderful shows such as X-factor hosted by [Fountain studios](http://Fountainstudios.com).

Building:	Large Multi Use Production Area
Location:	London
Manufacturer:	Specialist Coils
