

CASE STUDY

VETERINARY PRACTICE AIR CONDITIONING SERVICING & MAINTENANCE

Air Options are proud to have been appointed to provide regular, planned air conditioning servicing & maintenance for a local veterinary practice. We appreciate how important it is for their patients, their patient's owners to feel comfortable when visiting the vets, so in order to ensure optimal efficiency and temperature control, we have arranged a bespoke contract to provide four [air conditioning servicing](#) visits per year.

Regular visits will help to reduce the inevitable build-up of dirt and debris within each unit, greatly reducing the risk of filter blockage and costly breakdowns, whilst also allowing for maximum airflow and excellent temperature control.

In order to avoid any downtime or disturbance to the general running of the veterinary practice and their appointments, we must ensure our engineers are given sufficient time on site to allow for flexibility and give each unit the attention it requires. To achieve this our engineers are continuously liaising with staff whilst on site and working strategically to provide the highest level of service and professionalism, whilst ensuring air conditioning maintenance within the practice is completed in a timely manner.

Since the start of their air conditioning maintenance agreement, our client has noticed a considerable improvement in the systems efficiency and temperature control. Regular maintenance visits give our engineers the opportunity to highlight and rectify any issues as soon as they arise, helping to prevent serious and costly issues whilst maintaining excellent performance.

Please [contact us](#) today for a bespoke maintenance quotation to suit your requirements!
