

CASE STUDY

GARDEN CENTRE HVAC INSTALLATION

Air Options was appointed to supply and install HVAC systems serving a new build retail garden centre including offices and storage areas.

Initially Air Options tendered for the HVAC works based on client consultation drawings / brief, however, following discussions redesigned the entire scheme to offer substantial cost savings.

Multiple "exposed" high capacity ducted type units were selected as opposed to 4-way cassettes reducing plant qty and increase cost savings.

Systems were also selected as Panasonic to offer best value from a leading / reputable manufacturer.

Our in-house team also redesigned and installed the ventilation packages on site.

The retail area now benefits from heating and cooling, maximising customer comfort levels.

- Redesign / Reselection.
- Modular / inverter selections.
- Zoned temperature control.
- Client budget constraints met.
- Exposed solution.

Building:	Retail Garden Centre
Location:	West London
Manufacturer:	Panasonic
Heating & Cooling:	YES
Ventilation:	Extraction
Refrigerant:	R410a
Objectives:	Rebuild / Refurbishment
