

CASE STUDY

CITY OF WESTMINSTER SHOWROOM

Air Options installed Toshiba's Variable Refrigerant Flow (VRF) heat recovery air conditioning system for Johnstons of Elgin in Westminster, central London.

Air options engineered a system to meet the requirements of the planners which included an acoustic plant area at roof level to meet noise requirements. Given the challenges we overcame and quality of the installation, Toshiba approached Air Options with the view they could use the case study for their own website marketing purposes.

Air Options are happy to carry out all aspects of a project, from design and liaison with the planners, through to installation and sign off with building control. It doesn't finish there as we have a dedicated after sales department which will offer continued support with planned preventative maintenance and managing your warranty, extended or otherwise.

To read the Toshiba's article in full Click the case study pictures below.

Building:	Office Building
Location:	Central London
Manufacturer:	Toshiba
Heating & Cooling:	Simultaneous Heating & Cooling
Refrigerant:	R407c
Appointment Objectives:	Assess, Consult, Design & Install
