

CASE STUDY

ALL'S COOL AT WARR'S HARLEY-DAVIDSON

Few machines exude the feeling of quality engineering and unquestionable coolness as Harley-Davidson motorcycles and few retailers of these fine motor-engines have as prestigious a history as the Warr's family dealerships.

The company was founded in 1924 by Captain Frederick James Warr, going from strength to strength over the following decades to become the UK's main distributor group in 1960. From those early days up to today, Warr's has been synonymous with Harley-Davidson and is Europe's oldest and certainly most successful Harley-Davidson dealership Group.

Finely tuned machines

So it was with great pleasure that Air Options was recently contracted for installing the new air conditioning systems at the company's newly refurbished south-east London store in Mottingham Road.

The store has been given a complete and stylish new interior fit-out, all in keeping with the Harley-Davidson feel of total quality and luxury.

To this end, a new air conditioning system from renowned manufacturers Daikin has been installed by Air Options, providing an atmosphere inside the store as cool as the beautiful machines on display.

Cool under pressure

The re-development of the branch was on a regimented timeline to ensure the store re-opening on time and with as little disruption as possible, the rear workshop continuing to trade and help existing customers during this time.

With our experience and expertise we were easily able to design the perfect system for the premises, balancing cooling rate and system efficiency with the use of Daikin VRV technology in the external condensers and by accurately matching the system cooling output to the premises volume requirements.

True to our word the new system was installed and commissioned on time, ensuring the store could re-open as scheduled to the delight of local Harley enthusiasts!

Building:	Showroom
Location:	London
Manufacturer:	Daikin
Heating & Cooling:	YES
Ventilation:	N/A Existing
Appointment Objectives:	Assess, Consult, Design & Install
Engineering Achievements:	High Quality / Finish Exposed Installation
Timescale:	2 Weeks

Head Office

Environment House, Black Croft Road, Witham, Essex, CM8 3YN
